Half Year Summary

This year has been eventful for many reasons with excellent shows and displays created by the students with the guidance of dedicated staff.

The building project is just about to reveal the Sports Hall, the final coats of paint are being applied and the specialist floors are being laid. The pool is looking good with the water test to happen soon, the pool has been designed for all students within the School. The main pool is 25m in length and goes from a one meter shallow section to a two meter deep end, it has been designed specifically for swimming instruction and training. There is a separate 75cm depth pool for the beginners to become confident in the water.

The Sport Hall also has a full size basketball court on a high tech PVC floor, there is an indoor jogging track at first floor level above the basketball court. The floor area is also marked out for badminton, football (five-a-side), volleyball and netball which will ensure that the hall will be used for a great variety of sporting events and activities.

On the first floor there are four specialist rooms that the School Physical Education department can use for various activities and theory classes.

This Sports Hall is a major development in the growth of the School and will enhance the teaching provided to the students by providing world class facilities to expand and develop the curriculum.

It has been good to see many after School activities being provided by the teachers. This gives students the opportunity to take part and develop their skills in areas that interest them, I recommend that you encourage your children to take full advantage of the programmes offered by Primary and Secondary.

The next stage in the School development plan is currently being ratified once it is finalised I will send out an update to ensure you are all aware of what is happening.

Please note that I am leaving this year to move back to Australia with my family. It has been a pleasure to serve as the School Principal and I thank you all for your support and cooperation.

I am sure that the search and appointment of a new Principal will carry the School forward to a bright and successful future.

Yours sincerely,

Peter Hodge BEd, DipHE, MSc, MBA, MACE, FRSA
Principal
